- 1. The data used in calculating rate base are averages.
- 2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
- 3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

RE: 2001 PSC Analytical Review, DWCCA-2210-ELE

The following issues were addressed in the 2001 analytical review. If there are further questions, please contact me at 240-2322 or lgeurink@virchowkrause.com.

1. The \$564,872 of mains added on page W-17 were financed by:

TIF district = \$43,581

Developers = \$454,459

Village = \$66,832

The \$190,340 of services added on page W-19 were financed by:

Developers = \$183,700

Village = \$6,640

- 2. The 6 inch and larger meters were not tested during 2001 and only 3 6" meters were tested during 2002. As of this time, a plan has been established by the new water operator to test all of the meters 6" or greater in 2003 and each year thereafter.
- 3. The costs included on page W-19 in the \$139,484 for meter additions includes over \$100,000 to prepare existing meters for remote meter reading.
 4. We have updated our software for the 3.04 version.

Mr. Keith Yahn, Finance Director Germantown Water Utility P.O. Box 337 N112 W17001 Mequon Avenue Germantown, WI 53022-0337

2001 Analytical Review DWCCA-2210-ELE

Dear Mr. Yahn:

The Public Service Commission (Commission) staff has completed its analytical review of your utility's 2001 annual report. The primary purpose of the analytical review is to detect possible reporting or accounting related errors and also to identify significant fluctuations from prior years' data that are not sufficiently explained in the annual report. The analytical review did identify the following issues:

1. On pages W-17 and W-19, water mains and water services are reported added. However, no explanation of the financing of these mains and services is provided in the schedule footnotes. Please explain how these mains and services were financed, following the guidelines in the schedule head notes and follow this procedure in the future.

FINANCIAL SECTION FOOTNOTES

- 2. Meters 6-inch and larger are to be tested annually. On page W-19, it appears that not all the meters 6-inch and larger in use were tested. Please furnish an explanation.

WATER OPERATING SECTION FOOTNOTES

Water Operation & Maintenance Expenses (Page W-05)

Utility changed to a class AB chart of accounts on January 1, 2001 as required by the PSC. Therefore, comparisons by individual account is difficult. In general maintenance accounts are up by 30% due to more water mainbreaks, and maintence supplies for wells and springs.

Labor in 2000 was 279,201 compared to 301,576 in 2001. The 8% increase is due to a change in the administration charges allocated to the utility and a cost of living adjustment for utility employees. The Village examined the amount of effort the administration staff was spending for the water utility and changed the administration wage allocation. Labor was also reallocated from last years account 920 to 600,620,640,642 to conform with the AB chart of accounts.

Outside services is up over last year due to engineering related to 2 subdivisions that were intended to be changed over from private wells to the utilities water system. As the project costs and designs were developed the project was halted and will not be done in the foreseeable future - if ever. In addition, a test well was completed in 2001. The results of pumping tests were less than adequate and the test well was capped. This site will not be used for a well in the future and the associated costs were expensed.

Water Utility Plant in Service (Page W-08)

311 - Adjustment- in prior year costs for a possible project were capitalized when the rest of the project costs were in CWIP. In 2001, the test well didn't pump enough water and was capped. The costs in CWIP, along with the amount in 311, were reclassified to outside services.

310 - rounding error in past

Mains and services financing includes TIF, CIAC and special assessements. Meter minor adjustments due to the change to drive by meter reading and ϵ more accurate count of customers in the process of changing over.

Pumping and Purchased Water Statistics (Page W-12)

They need to update their version at the utility to version 3.4. ele

Meters (Page W-19)

Meter minor adjustments due to the change to drive by meter reading and ϵ more accurate count of customers in the process of changing over.

Hydrants and Distribution System Valves (Page W-20)

Utility did not have enough time to operate more valves this year.
